MORE OPPOSITION TO ALASKAN BILL

Against All Year Sale of Big Game.

NEW SUBSTITUTE URGED

Washington, D. C., March 9 .- The Sulzer bill "to regulate the killing and nate of certain game animals in northern Alaska" since its second hearing, when Mr. Sulzer suggested certain changes

ritories, the Biological Survey and Sen-ators and Congressmen are beginning to hear from the delegates to the Ameri-can Game Protective Association, which held a national conference in New York creekett Club. Campfire Club. Permanent Wild Life Protection Fund. Note cliv, living in retrospect the while scenes

Alaska "as soon as practicable.

The sale of big game in Alaska, which
the second hearing brought out, was
more or less unknown except to a few. And among the few it was the belle! that the caribou only was permitted to be sold. Instead the sale of big game in Alasto. noose, caribou and mountain sheep, has been permitted for sixteen years.

Opposition to the bill has also developed from other quarters. The respirition of the Missouri Fish and Game League, however, expresses the views of other organizations who have added

resolution of the Missouri league. attested by J. R. Hickman, secretary, says that "the passage of such a bill; this time would seriously affect tha

hands of the Governor of Alaska in case an emergency or contingency should arise wherein it is deemed a necessity to obtain game for some of the communities north of 62 degrees the power to permit the killing and sale during the autumns and kinters for the

measure the Governor shall specify certain agents to kill three caribou, we moose and three mountain sheep and to transport the meat to Pairbanks, Nenana, Eagle and such other localities he shall specify and arrange for its sale at retail only and at prices a pound, which he shall specify and regulate, to individuals only for consumption by them and their families. its sale at retail only and at prices a pound, which he shall specify and regulate, to individuals only for consumption by them and their families.

Dr. William T. Hornaday of New York pointed out that if the Sulzer bill should become a law it would be utilized in feeding a great majority of the rail. in feeding a great majority of the rail-

road laborers who are building the Central Rallroad of Alaska.

With the protests that are piling up against the measure of 's not believed that the Sulzer bill, which would permit the sale of moose, caribou and mountain about all the year round will mountain sheep all the year round, will be passed by Congress.

CALL OF THE WILD.

Savage Goshawk Helps 'TROUT RELISH A Deplete Ruffed Grouse

Protests Reach Washington Plunderer Making Inroads on Partridge-Menace of Sometimes Fish Are Stirred to the Blue Hawk Regarded as Beyond Human Intervention-Its Migrations.

By TAMARACK.

During several months the outdoors, magazines and the departments of the daily press which like our own Rod and Cun devote space to news bearing on fish and game and their conservation have published alarming accounts of the occupations calculated to afford excellent occurrence of unusual numbers of sosoccurrence of unusual numbers of goshawks, of their widespread distribution in unwonted territory and of attendant

depredations. When the mantle of winter is thrown over the northland and the trout, their spawning duties at the fountainheads ended, have dropped down into the deeper waters to await the loosening of the ice grip; when the sportsman and riler in the week.

These men, representing the Boone and the angler pursue their serious callings nent Wild Life Protection Fund. Netional Association of Audubon Focieties and other organizations, not only have asked for the defeat of the Sulaw bill, but also the Secretary of Agricultude has been urged to stop the sale of game in Alaska "as soon as practicable."

The sale of big game in Alaska, which out, was levies merciless tribute on the coverts

of ruffed grouse and northern hare.

The lone trapper, going the rounds of the line trapper, going the rounds of his trap line on the margins of frost bound stream and through timberlands of hardwood and conifer, encounters a crimsoned blotch of snow littered with for or plumage and discerning a slate colored feather or two tora loose in fray recognizes the evidence in the woodland tragedy and mutters "Blue bawk!"

Gosbawk a Plunderer.

The goshawks, mightiest of the falsave the eagles, arrive in the Adirondacks during a season of average severity about the first of November and depart on the return fourney to the haunts of the spruce grouse and the would only be a short time until the parmigan with the first indications of whole the of defence was beaten down the onset of the spring thaws. Throughin every part of the country."

Game in Governor's Hands.

Game in Governor's Hands.

Although the ruffed grouse and the ruffed grouse grouse and the ruffed grouse grouse and the ruffed grouse Mr. Sulzer's latest suggestion for his varying hare are the main objects of bill is to strike out all reference to the the goshawks' pursuit, along in March, tagging system. He would place in the when the rapacity of the hawks has depleted the ordinary feed supply, the Canada Jays, already engaged in bardy nesting, furnish ready subsistence and havor is created in the flocks of these ghostly forest dwellers.

the power to permit the killing and sale during the autumns and winters for the period of the war and for one year thereafter.

As a general habit the geshawks in their winter habitat hunt in solliary fathlon after the manner of the great housed owl and the barred owl; but According to the proposed substitute again, as in the case of these latter

opportunities for noting the whereabouts of birds in general—I never saw or heard of a goshaw below the Adiron-dacks, indeed these bine hawks have hitherto been reported in lower New York and beyond only as accidental vis-I used to be fully as much at home on the Catskill tableland while peak and notch and hollow lay buried beneath the great snowdrifts of the long winters as I was when the characteristic soil of the valleys formed of disintegrated red

shales and sandstones stood forth under the summer suns. From infancy through boyhead many months of my life were spent there. The gods of the open places were good to me in having placed one of my fore-

bears and sundry uncles in such a to me congenial environment. The glean-ing of the bemlock, marking the primal industry of the Catskills, was amply atomed for by the intact stands of spruce. My long stopovers included two entire winters.

And my mind was more taken up with the doings of the fauna back in the woods and on the mountain tops

than with the business under transaction in the traditional red schoolhouse, where an irksome measure of hours was endured, a watchful grandmotherly eye fal-the race and the goshawks did not resort to the Cats-kills ir those early days.

The absence of goshawks thereabouts was but a natural feature of the game

situation of the period. Though game and woods vermin were on every hand their numbers increased as the Catskills were left behind and the Adirondacks were approached. The nice balance of nature was as yet undisturbed. Hence there was small need for the misrating hawks to wander into the sanctuary of

Ruffed Grouse in Danger Zone. It is unquestionable, however, that the goshawks have made their way of late

into the Catskills and into the neighboring Helderbergs and Shawangunks by an extension of migration down from the Adirondacks and across from the
